Global Multi™ is a refinement of our very popular Global-series.

GLOBAL MULTI™ Sewer nozzle

We have expanded our range of sewer nozzles with our new Global Multi™ series. Global Multi™ is a refinement of our very popular Global-series. The design of the Global Multi™ sewer nozzle is similar to the Global series, but is larger, heavier, and includes stainless replaceable jets. Each Global Multi™ can be mounted with up to four front jets together with four or six rear jets (depending on thread size).

The interchangeable stainless jets allow the Global Multi™ pipe cleaning nozzle series to be easily adapted to different pump capacities, and the jets can be configured as needed for specific pump setups. The operator decides what flow and pressure is appropriate, how many jets are needed, and how they are arranged. Global Multi™ sewer nozzle comes with stainless steel or ceramic jets.

Art no	Description	No. of front jets	No. of rear jets
2-11150-C	Global Multi ¼"	4 x M4	4 x M5
2-11250-C	Global Multi 3/8"	4 x M4	4 x M5
2-11350-C	Global Multi ½"	4 x M5	6 x M6
2-11450-C	Global Multi ¾"	4 x M5	6 x M6
2-11550-C	Global Multi 1"	4 x M5	6 x M8
2-11650-C	Global Multi 1 ¼"	4 x M6	6 x M10
